

## THREADED STANDOFFS FOR CLOSE-TO-EDGE APPLICATIONS

- TYPES DSO, DSOS - METRIC

These standoffs, which use the proven self-clinching design, install with a squeeze in properly sized round holes and become permanently mounted in the thin sheet.

Use for D-bus connect sheet.

Types DSO and DSOS standoffs are available for close-to-edge applications.

If you require a standoff which we do not offer in this bulletin, please contact us. We will be happy to work with you to satisfy your special need.

It can also be produced according to the customer's drawings, and designed according to the customer's plate hole. DSO self-clinching standoffs provides a cost-effective solution for the installation of the interface, quick and simple installation.
